DESIGN BRIEF

AI TownSquare Civic Insight Brief

PDF Document + Website Brief Page + Social Media Assets

Prepared for the designer responsible for producing the final Civic Insight Brief (CB-DXB-001) as a publication-ready PDF, a website brief page, and social media assets.

This document specifies exactly what to build, the visual standards to follow, what to avoid, and the institutional reference points that define the quality bar.

CLIENT	AI TownSquare / SafeHaven
DOCUMENT	Civic Insight Brief CB-DXB-001 — Dubai Node
DELIVERABLES	1. Publication-ready PDF 2. Website brief page 3. Social media asset pack
CONTENT SOURCE	The approved .docx file (Civic_Brief_CB-DXB-001.docx) contains all final text, structure, and section order. Do not alter content.
BRAND TOOLKIT	AI TownSquare Brand Toolkit (existing). All colours, logo usage, and tagline are established.
DATE	April 2026

1. DESIGN PHILOSOPHY

This document is not a marketing asset. It is not an event recap. It is not a brochure. It is a civic diagnostic — a published record of structured dialogue that feeds into a global readiness index. Every design decision must serve that identity.

Reference Points

The quality bar for this document is set by institutional policy publications, not tech or startup design. The designer should study the following before beginning work:

- Chatham House research papers — chathamhouse.org/publications (clean, authoritative, serif body text, institutional headers)
- OECD AI Policy Observatory briefs — oecd.ai (data-rich, structured, navigable)
- Brookings Institution reports — brookings.edu/research (wide margins, clear hierarchy, designed for annotation)
- UN Development Programme human development reports — hdr.undp.org (global authority, data visualisation integrated with narrative)

What This Document Must Feel Like

Authoritative. Precise. Designed to be read by a senior policymaker, cited by a researcher, and forwarded within an institution. It should feel like opening an intelligence briefing — clean, high-information-density, no decoration for its own sake.

What This Document Must NOT Feel Like

- A tech startup pitch deck (no gradients, no dark mode, no dashboard aesthetic)
- A conference event report (no group photos, no “great day!” energy)
- A marketing brochure (no calls-to-action beyond the citation block)
- A SaaS product interface (no “neo-brutalist” or “software terminal” styling)

2. COLOUR PALETTE

Use the established AI TownSquare brand palette. Do not introduce new colours. Consistency across the brief, the website, and social assets is non-negotiable.

	Civic Navy	#1B2A4A	Primary text colour. All headings, body text, and structural elements.
	Signal Teal	#2A9D8F	Accent colour. Section dividers, pillar tags, data highlights, monospace code blocks, the self-correcting loop diagram.
	Insight Gold	#E9C46A	Sparingly. Pull-quote marks, the Governance Friction Point highlight, key data callouts. Never for body text.
	Off-White	#FAFAFA	Page background. Not pure white — a warm off-white that reads as “paper” on screen and in print.
	Light Grey	#F5F5F5	Data blocks, code fields, the SRI signal panels, background for monospace text.
	Mid Grey	#999999	Metadata, captions, secondary labels, footer text, timestamps.
	Dark Text	#2D2D2D	Body text alternative where Civic Navy is too heavy (e.g., long paragraphs in the Catalyst Assessment).

NO dark mode. NO “Deep Obsidian” or “Carbon” backgrounds. NO “Warning Orange” or “Action Blue.” The palette above is the complete colour system.

3. TYPOGRAPHY

Three-tier typographic system. Each tier has a distinct function. Do not mix tiers.

Tier 1: Headers — Sans-Serif

Font: Inter, Suisse Int'l, or Helvetica Neue. Bold weight. Used for section titles, subsection titles, and the document title. Colour: Civic Navy. Purpose: Authority and structure.

Tier 2: Body — Serif

Font: Source Serif Pro, Garamond, or Tiempos Text. Regular weight. Used for all narrative text, theme descriptions, the Catalyst Assessment, and the Methodology Note. Colour: Dark Text or Civic Navy. Purpose: Readability and "the record." The serif signals that this is a document of substance, not a slide deck.

Tier 3: Data — Monospace

Font: JetBrains Mono, IBM Plex Mono, or Roboto Mono. Used for: the Brief Reference Number (CB-DXB-001), sector attribution tags ([LAW], [FIN/TECH], [ACAD], [HEALTH], [GOV/TECH], [CATALYST]), SRI signal scores, the self-correcting loop notation, the registry URL, and the citation block. Colour: Signal Teal on Light Grey background, or Mid Grey for metadata. Purpose: Raw data / diagnostic signal. This tier tells the reader "this is structured, indexable information."

Sizing Guide (PDF)

Element	Font	Size	Weight
Document title	Sans-serif	24–28pt	Bold
Section titles	Sans-serif	14–16pt	Bold
Body text	Serif	10–11pt	Regular
Data / tags / reference	Monospace	9–10pt	Regular / Bold
Pull quotes	Serif italic	11–12pt	Italic

4. DELIVERABLE 1 — PUBLICATION-READY PDF

Page Setup

- Size: A4 (210 × 297mm) — standard for international institutional publications
- Margins: 25mm top, 30mm outer edge (allows space for annotation/red-lining), 20mm inner, 20mm bottom
- Background: Off-white (#FAFAFA), not pure white
- Bleed: None required — this is a digital-first document

Cover Page (Page 1)

- AI TownSquare logo — top left, modest size, Civic Navy or Signal Teal version
- "CIVIC INSIGHT BRIEF" in monospace, Signal Teal, positioned as a document type label
- "Dubai Node • DIFC • 3 April 2026" in sans-serif, large, Civic Navy, as the primary title
- Civic Question in serif italic, indented, below the title
- Document Identity block — the metadata table (Brief Reference, Node, Date, Civic Contributors, Civic Catalyst, Convened By, Protocol, Publication, Submission, Registry) — in monospace/sans-serif, clean grid, no heavy borders
- Self-correcting loop statement at bottom: "TownSquare → SRI → Readiness Institute → TownSquare" in monospace, Signal Teal
- No photographs on the cover. No decorative elements. The data is the design.

Interior Pages

- Running header (right-aligned): "CB-DXB-001 | AI TOWNSQUARE CIVIC BRIEF" in small monospace/sans-serif, Mid Grey
- Running footer (centered): "aitownsquare.org/briefs/CB-DXB-001 | Submitted to the Societal Readiness Index | Page X" in small type, Mid Grey
- Section titles: sans-serif bold, Civic Navy, with a Signal Teal underline rule
- Pull quotes: indented, serif italic, with a Signal Teal left-border rule (4–6px). Attribution below in sans-serif with the sector tag in monospace bold Signal Teal
- SRI signal blocks: each pillar presented as a panel with Light Grey background, pillar name in sans-serif bold, question in serif italic, signal score in monospace bold Signal Teal, interpretation in serif regular
- The Governance Friction Point section: visually distinct — consider a subtle Insight Gold left-border or a Light Grey panel to signal its importance as the highest-value finding
- The Readiness Institute Action Item: monospace text on a Light Grey band, Signal Teal label

Final Page

- Citation block in monospace
- SafeHaven / AI TownSquare footer with tagline: "Global in Voice. Local in Presence. Civic by Design." in serif italic, Signal Teal
- QR code (bottom right) linking to aitownsquare.org/briefs/CB-DXB-001 — small, clean, with the URL printed below it in monospace
- Next Node announcement in sans-serif

Photography

If photographs are used (optional — the document works without them):

- Documentary style only. Black and white.
- Focus on: hands writing, papers on table, intense concentration, the DIFC architecture, the room setup before participants arrive
- NEVER: group photos, smiling faces, coffee cups, “event” photography, stock images
- Maximum 2–3 photographs in the entire document. They are accents, not features.

5. DELIVERABLE 2 — WEBSITE BRIEF PAGE

URL

aitownsquare.org/briefs/CB-DXB-001

Design Approach

This page is a permanent archive entry in a growing registry of civic intelligence. It should look and feel like a research paper landing page at an institutional think tank — not a blog post, not a dashboard, not a SaaS product page.

Reference: the Chatham House publications page, the Brookings research library, or the OECD iLibrary. Clean, structured, scannable.

Page Structure

1. Document Identity bar at top — Brief Reference (CB-DXB-001), date, node location, Civic Question. Monospace reference number. This bar is the first thing the reader sees.
2. YouTube embed — the session broadcast, positioned prominently below the identity bar.
3. Sticky sidebar table of contents — lists all sections (Executive Framing, Three Themes, Catalyst Assessment, SRI Signals, Governance Friction Point, Participant Voices, Self-Correcting Loop, Methodology). Highlights the current section as the user scrolls. No animation — simple highlight state change.
4. Full brief text — all sections rendered on the page, scrollable. NOT hidden behind tabs or accordions. The reader should be able to scroll through the entire brief without clicking.
5. PDF download button — prominent but secondary to the on-page text. Label: "Download Full Brief (PDF)" — not gated, no form required. This is a public good.
6. Citation block at bottom — exactly as it appears in the PDF. Copy-to-clipboard functionality.
7. Self-Correcting Loop diagram — a clean, static SVG or CSS diagram showing TownSquare → SRI → Readiness Institute → TownSquare. This should be visually prominent.

What NOT to Build (Yet)

- No interactive SRI spider chart — insufficient data from one Node. Build the container; populate after 3+ Nodes.
- No global Node map — one dot on a world map looks aspirational, not substantive. Add when multiple Nodes are active.
- No gated access, no “Request Access” forms. The brief is fully public. The transcript is “available upon request” — a mailto: link is sufficient.
- No scroll-triggered animations or micro-interactions. Clean transitions only.
- No dark mode toggle for this page.

6. DELIVERABLE 3 — SOCIAL MEDIA ASSETS

These assets support a 5-day LinkedIn publishing sequence. They are "Intelligence Dispatches" — they lead with a finding, not an event.

Asset 1: Governance Friction Point Carousel (5 slides)

Format: LinkedIn carousel (PDF upload, 1080 × 1080px or 1080 × 1350px)

- Slide 1: "The one question 25 cross-sector professionals in Dubai could not resolve." — Civic Navy background, white sans-serif text, CB-DXB-001 reference in monospace at bottom
- Slide 2: The question itself: "Who bears the cost of AI-driven workforce transition when market logic and civic logic produce opposing answers?" — Off-white background, Civic Navy serif text, Signal Teal accent line
- Slide 3: The tension explained in 2–3 sentences, with the fiduciary vs. civic logic framing
- Slide 4: Olga's closing thesis: "If the institution moves faster than its governance, and the citizen moves slower than the institution — who is actually in control?" — Pull-quote format
- Slide 5: "Read the full Civic Insight Brief" — URL: aitownsquare.org/briefs/CB-DXB-001 — AI TownSquare logo, tagline

Asset 2: Key Quote Card (single image)

Format: 1200 × 628px (LinkedIn link preview) or 1080 × 1080px (square)

- One powerful quote from the session with sector tag: e.g., "AI is scaling decisions faster than we are scaling accountability." [LAW]
- Off-white background, serif italic quote, monospace tag, Signal Teal left-border accent
- CB-DXB-001 and aitownsquare.org in small monospace at bottom

Asset 3: Catalyst Observation Card (single image)

Format: same as Asset 2

- One line from Olga's assessment: e.g., "In a domain where agency is everything, there is a vacuum of agency."
- Attribution: Olga Medvedeva, Civic Catalyst — Human-AI Impact Psychologist
- Same visual treatment as Asset 2 for consistency

Asset 4: Self-Correcting Loop Diagram (single image)

Format: 1200 × 628px

- Clean circular diagram: TownSquare (Dialogue) → SRI (Diagnosis) → Readiness Institute (Action) → TownSquare (Refinement)
- The Civic Brief shown as the artifact that moves between stages
- Minimal, on-brand. Signal Teal nodes, Civic Navy text, off-white background

Asset 5 (Optional): Catalyst Clip

If video footage exists from the session broadcast: a 30-second clip of Olga delivering one clinical observation. No background music. Overlay: CB-DXB-001 reference, AI TownSquare logo. Subtitle the audio. Format: 1080 × 1080px (square for LinkedIn/Instagram) or 1920 × 1080 (landscape for YouTube).

Visual Rules for All Social Assets

- NO event photos, no group shots, no "people having a great time" imagery

- NO emojis, no exclamation marks, no casual language
- Every asset includes the brief reference number (CB-DXB-001) in monospace
- Every asset includes the URL: aitownsquare.org/briefs/CB-DXB-001
- The tone is: institutional signal, not marketing content

7. EXPLICIT DO / DON'T LIST

DO

- Use wide margins — policymakers annotate documents. Give them space.
- Use the three-tier typography consistently across all deliverables.
- Use sector tags in bold monospace: [LAW] [FIN/TECH] [ACAD] [HEALTH] [GOV/TECH] [CATALYST]
- Use the established brand colours exactly as specified.
- Include the citation block on every page footer (PDF) and at the bottom of the web page.
- Include the QR code on the final PDF page.
- Treat pull quotes as primary evidence — they are not decorative.
- Make the Self-Correcting Loop diagram visually prominent in all deliverables.
- Keep the PDF under 20 pages. This is a brief, not a book.

DON'T

- Don't introduce new brand colours.
- Don't use dark backgrounds or dark mode anywhere.
- Don't use gradients, drop shadows, or decorative borders.
- Don't add a "Foreword by the Founder" — the founder is listed in the Document Identity block.
- Don't gate any part of the brief behind a form or login.
- Don't add stock photography or generic AI/tech imagery.
- Don't use a dashboard, terminal, or software aesthetic for the website.
- Don't use an SRI spider chart or global node map yet — insufficient data for one Node.
- Don't alter the content, section order, or wording from the approved .docx source file.
- Don't add a Nomos Protocol watermark — this is an AI TownSquare / SafeHaven document.

End of Design Brief
